

## A variation of the Königsberg Bridge Problem

### The 8th bridge

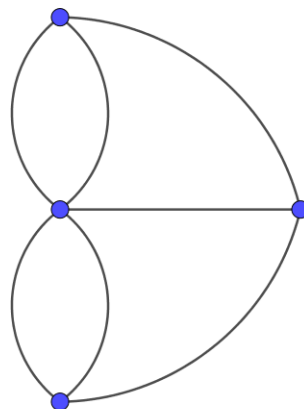

The blue prince would like to add an 8<sup>th</sup> bridge to Königsberg, in such a way that he can take a walk starting at his castle, passing exactly once over each of the bridges and ending at the tavern. Where is he going to build the 8<sup>th</sup> bridge?

### The 9th bridge

The red prince now decides to add a 9<sup>th</sup> bridge, such that he can take a walk that starts at his castle, passes each bridge exactly once and ends at the tavern. At the same time, he wants that the blue prince does not anymore have the possibility to take such a walk. Where is he going to build the 9<sup>th</sup> bridge?

### The 10<sup>th</sup> bridge

The priest, being unhappy about the dispute between the two princes, finally decides to build a 10<sup>th</sup> bridge in Königsberg with the goal that all people have the possibility to take a walk starting at their home, passing exactly once over each bridge and finishing again at their home. Where is he going to build the 10<sup>th</sup> bridge?
